

Pasted markdown.md
File

I have attached my Bookstore project context. I currently have a working CRUD for Books. I need to implement a similar CRUD for Magazines.

Create a `Magazine.jsx` component that displays title, price, and the `currentIssue` date. It should support Delete and Update.

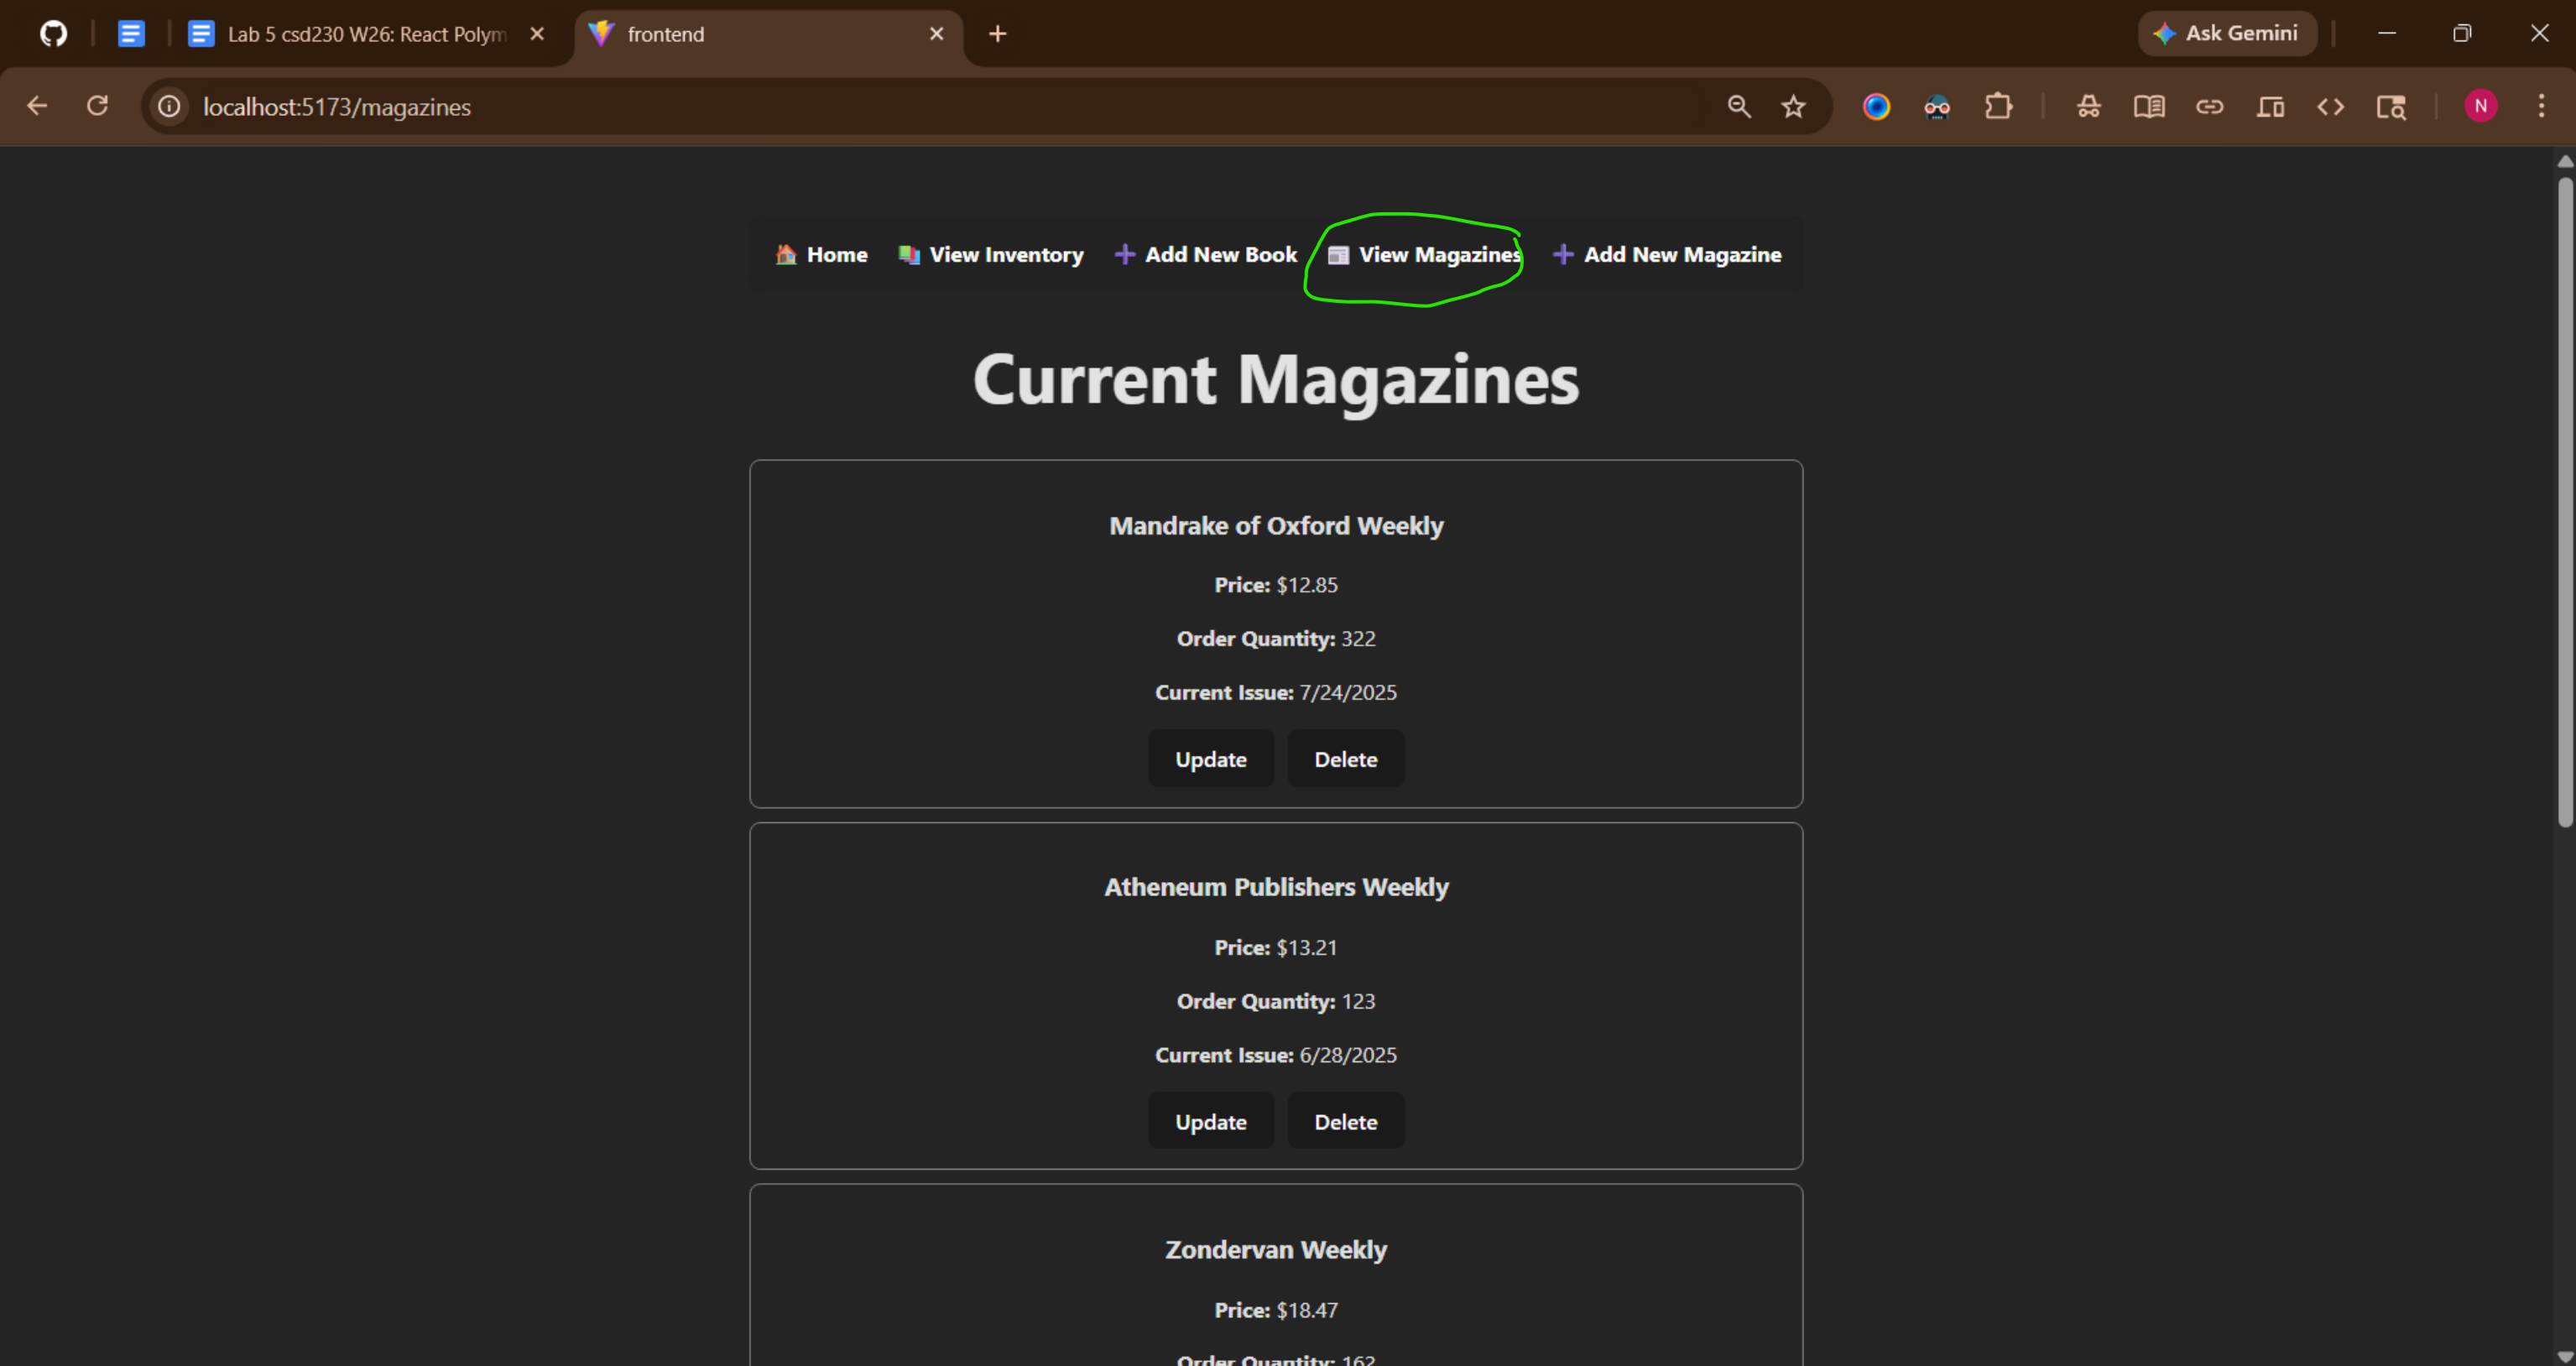

Create a `MagazineForm.jsx` that handles the specific fields for a Magazine (title, price, `orderQty`, `currentIssue`).

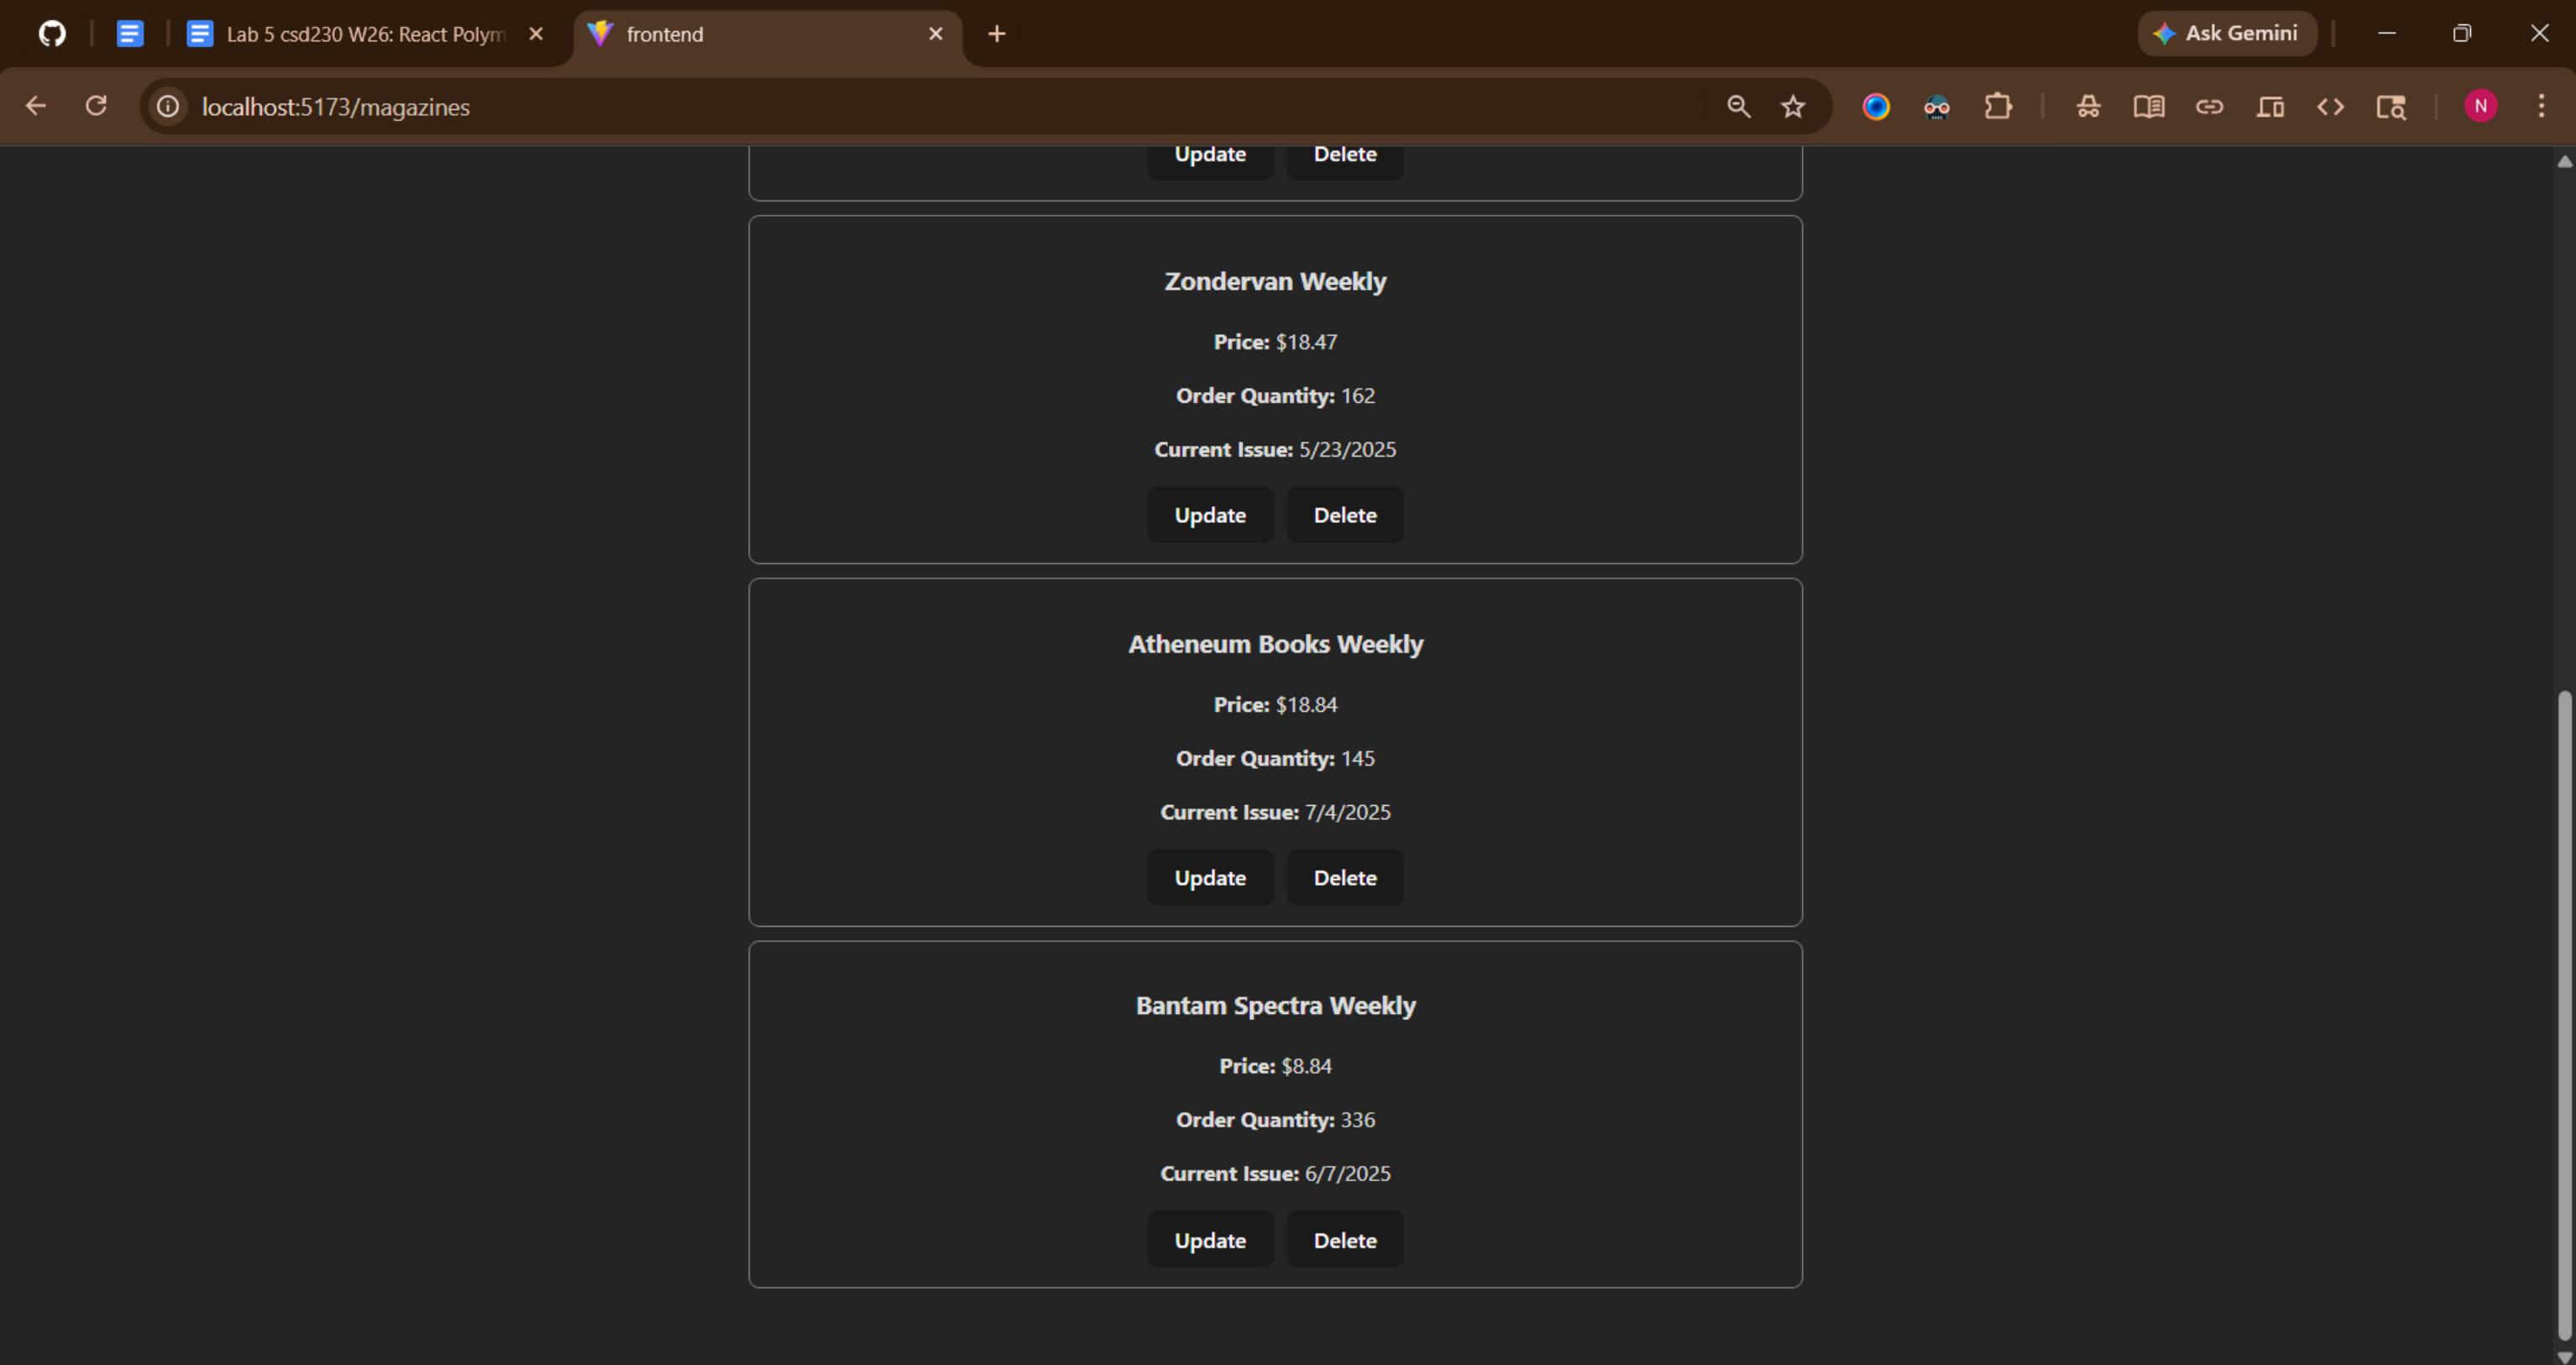

Update `App.jsx` to include a `magazines` state and fetch data from `/api/magazines`.

Update the Routing in `App.jsx` so that `/magazines` shows the list and `/add-magazine` shows the form.

Update `Navbar.jsx` to include links for these new routes. Match the existing styling and logic patterns (Fetch API, Spread Operator, etc.) exactly.

Ensure it handles the `currentIssue` date format correctly
